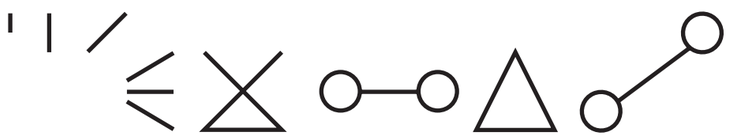
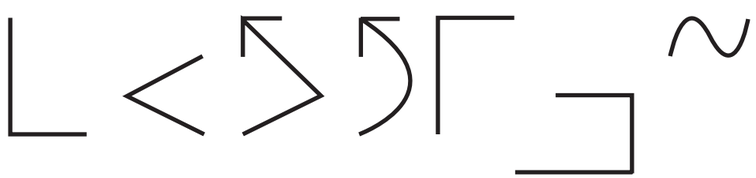
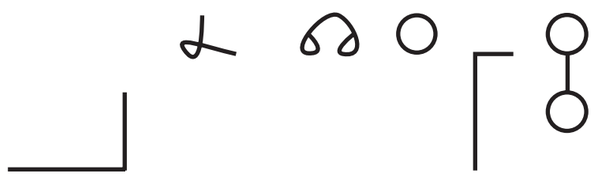
LANGUAGE:
ONE

hi. I'm urvi.
this is my language.
...

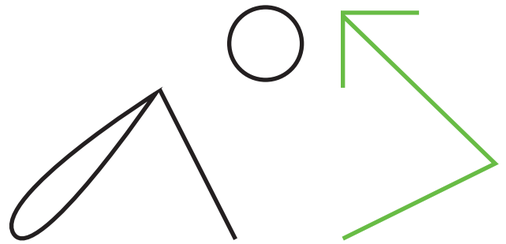






{
(in the language)
you can drag each 'letter' around and rearrange it
the first letter will be blinking in red to indicate that the user needs to hover over it
as you hover over it, the sound plays. the color changes from red to green.
each letter you hover over: turns green, sound plays.

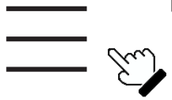
you can create your own words
you can adapt it to different languages



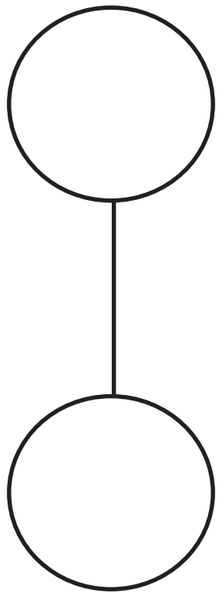
as you hover through the letters,
it speaks each sound

eg. this word is 'and'

LANGUAGE: TWO



click on the menu for all
letters to appear

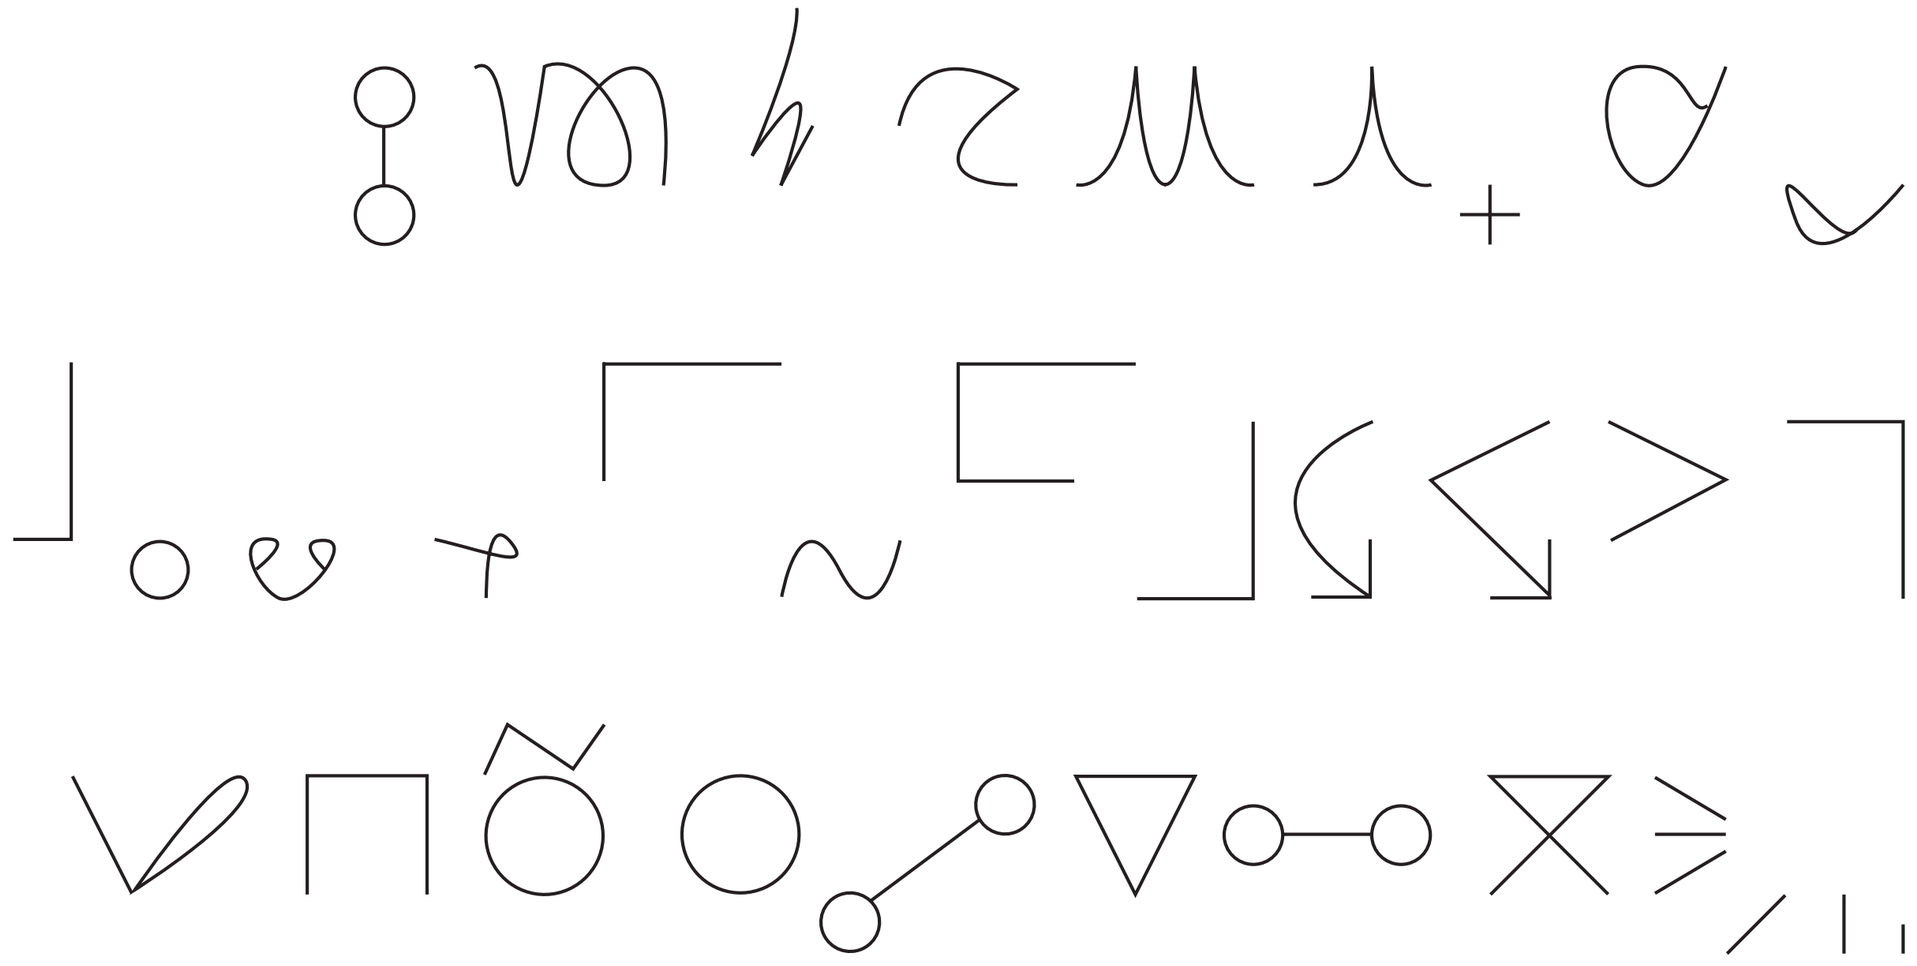


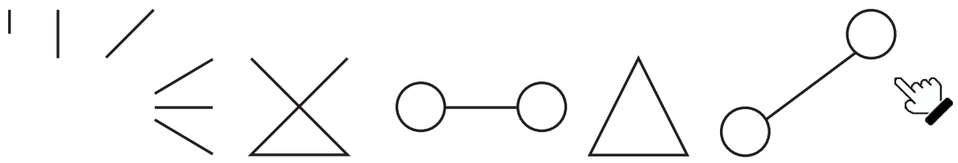
page opens and ‘letters’ keep
changing automatically

if you hover it gets paused and the
sound of the letter plays

if you click it stops and no sound
plays.

you can then switch beterrn
letters with arrow keys





drag and drop.
hover to hear sound
